

Component Prep Operator

Brief Job Description:

- Prepare electronic components for Printed Circuit Boards (PCBs).
- Modify components using fixtures, tools and semi-automated lead forming machines.
- Assemble hardware and electronic components together and assemble onto PCBs.
- Place/populate electronic components on bare or partially populated PCBs.

Requirements:

- Able to follow rules/work instructions; work well with others; pay close attention to detail and neatness.
- Exceptional hand/eye coordination.
- Demonstrated knowledge and application of applicable ISO processes.
- Speaks and reads English information printed on work instructions, drawings, and procedures.
- Able to meet a Monday – Friday 6:00am-2:30pm work schedule.
